

## **Group Members: Students (10/2020; alphabetical order)**

### **Zuzanna Bartczak**

BSc Student, Biotechnology

Topic: Synthesis of molecular cages for biomedical applications

### **Aleksandra Cupriak**

BSc Student, Biotechnology

Working on her BSc thesis

Topic: Functionalization of graphene for biomedical applications

### **Jakub Cyniak**

BSc Student, Chemical Technology

Working on his BSc thesis

Topic: Synthesis of aromatic, dendrimeric compounds

### **Natalia Czerwińska**

BSc Student, Biotechnology

Topic: Synthesis of aminoacids bearing a redox-active unit

### **Paulina Filiks**

BSc Student, Biotechnology

Topic: Functionalization of PAMAM dendrimers for biomedical applications

### **Anna Gabor**

BSc Student, Biotechnology

Topic: Biomedical applications of ferrocene-containing aromatic dendrimers

### **Aleksandra Kosińska**

BSc Student, Chemical Technology

Working on her BSc thesis

Topic: Synthesis and applications of molecular cages

### **Maurycy Krzyżanowski**

BSc Student, Chemical Technology

Topic: Synthesis and applications of molecular cages

### **Jan Zając**

BSc Student, Biotechnology

Topic: Synthesis and biological applications of iron oxide nanoparticles
